

EXAR® 150-PV

UL 3829 CSA AWM 150°C Dry / 90°C Wet - 600 Volts

Champlain Cable announces **Exar® 150-PV**, **Class H**, 600 volt, irradiated cross-linked wire. Exar 150-PV is a **lower cost**, **thin** and flexible insulated hookup wire. Exar 150-PV can cost effectively **replace** wire with **FEP**, **Tefzel** and **TFE** or **Rubber** insulations. Irradiation cross-linking assures this insulation will not melt or flow at soldering temperatures or during repeated exposure to direct sunlight on hot surfaces. It has excellent mechanical strength, cut through resistance, chemical / solvent resistance and sunlight resistance. Unlike TFE or FEP, Exar 150 is easy to print.

Benefits and Features

Lower Cost Effective Replacement of Fluoropolymer and Rubber Insulation Flexible

Class H Rating, Suitable for Class N Systems Superior Processing

Outstanding Chemical and Solvent Resistance

Excellent Sunlight (UV) Resistance

Easy to Print and Pot

Applications

Including but not limited to:

Motors Lighting Devices
Appliances Electronic Devices
Heaters Thermal Sensors
Thermal Protectors Medical Electronics

Transformers Generators

Photovoltaic Equipment
