V-System™ Compatible Mounting Accessories

EGR enclosures feature V-System-ready sides with small laser knockout holes on a 5-1/4" grid. V-System brackets and accessories use the grid to provide highly flexible mounting options for large and small AV components, power strips, cabling, and even rackrail. Brackets can be used in any combination, vertically or horizontally, to meet the needs of installers.

V-System accessory brackets provide mounting points for equipment and other system elements such as rackrail and lacer bars.
Models are available in fixed and slotted hole patterns, and with various standoffs, for flexibility. Here are some examples:

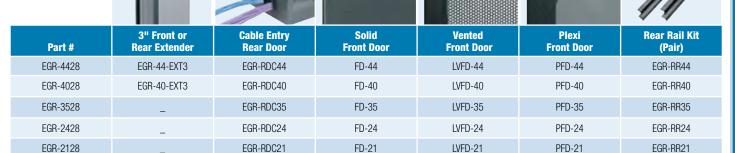

V-System sub-plates bridge the mounting grid to provide wider mounting surfaces and feature a versatile mounting pattern.
