## NU-SLEEVE SG-200

Electrical Equipment

NU-SLEEVE SG-200 is available in 5 electrical grades (A, B, C-1, C-2 and C-3) in a standard wall (NEMA TF-1, Table 3-1) construction. All grades are made using braided E-Glass yarns that have been heat treated to optimize coating adhesion and minimize surface irregularities and then coated with either a liquid silicone rubber (LSR) or a high polymer silicone (HPS) solution, whichever best fits the application. LSR products are available in Grades A, B and C-1.

HPS products are available in Grades C-1, C-2 and C-3 only. All SG-200 products have a high resistance to abrasion, are more homogeneous than extruded rubber sleeving and both types have a high heat/flex capacity. It is highly resistant to end fray and coating fracture, even when stretched over rectangular conductors or wires larger than the normal maximum inside diameter, making it an ideal choice for high stress applications over a wide temperature range from -55°C to +200°C.

All NU-SLEEVE SG-200 products are highly resistant to inorganic acids and alkalis. HPS shows no swelling or distortion from Chlorinated organic solvents and aromatic hydrocarbons but these agents will cause some swelling and subsequent reduction in Tensile strength for LSR. Consult the factory for more information concerning specific chemical compatibilities.

NU-SLEEVE SG-200 is used extensively in high temperature applications where one or more of the following features are required: flexibility, expandability, abrasion resistance, cut-through resistance and chemical resistance. It finds application in terminal and lead-wire insulation and protection, wire harness protection in extreme environments as well as high current dry transformers. It may also be stacked or telescoped with the same or other insulation products to obtain higher dielectric voltage ratings.

## SILICONE RUBBER COATED BRAIDED FIBERGLASS SLEEVING

- Class 200 Insulation
- Grade A (7000V) UL & CSA Electrical Component UL File #E93101, CSA File #LR67735
- Grade A (7000V) & B (4000V) VW-1 Flame Retardant UL File #E80713 / #E93101
- Applicable Specifications:
  - o NEMA TF-1 Type 5
  - o UL 1441 VW-1
  - o FMVSS 302
  - o SAE ARP 1536 Abrasion Test
  - o MIL-I-3190/6, QPL-3190: Grade A (8000V)
- RoHS and WEEE compliant.
- Low temperature brittle point below -70°C
- Available sizes: AWG #24 2 1/2"

Abrasion resistance

- $\bullet$  Packaging: standard spools, bulk spools, cut to length ( $\frac{1}{2}$ " diameter and under). Above 1 1/2" supplied in 4' lengths.
- Colors: white, black, natural, red iron oxide are standard. Other available colors are subject to factory quotation upon request.

**Notes:** 1). Grade A (7000V) is shown in the above part numbers. For other grades, substitute as follows in place of ER565:

- o ER564 Grade B LSR
- o ER563 Grade C-1 LSR
- o ER562 Grade C-1 HPS
- o ER561 Grade C-2 HPS
- o ER560 Grade C-3 HPS
