Features and Benefits

- The fir tree branch design on all four sides makes a 360 degree interface with the panel, creating a more secure fit into the hole.
- The disc on the top of the fir tree covers the hole and minimizes the ingress of water and dirt
- The oval hole fir tree fits 4 common automotive oval hole sizes.
- The specific connector slot on this part reduces rattle and movement of clip to the wire harness connector.

Product Description Connetor Clips are designed with various fixing point designs, to accommodate the many connectors out in the market. This specific connector clip is designed for a commonly used automotive connector. The width and the height of the fixation point creates minimal rattle when secured. The innovative design of the fir tree creates an interface with four different size holes that are common in the automotive industry. The fir tree branch design on all four sides makes a 360 degree interface with the panel, creating a more secure fit into the hole.
