DETAIL SPECIFICATION SHEET

CABLE, ELECTRICAL, -20 °C TO +105 °C, 1000 VOLTS, TYPE LS4OW

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-DTL-24643.

Construction (Watertight with Circuit Integrity)

First - Copper conductor, coated or uncoated (see table I for size).

Second - Thermoset insulation, extruded or taped (see <u>table I</u> for minimum average wall).

Third - Optional glass braid.

Fourth - Optional covering, unless required (see 3.3.5 of MIL-DTL-24643).

Fifth - Four conductors shall be cabled together to form a firm well-rounded assembly with a lay

not less than 8 or greater than 16 times the cabled diameter. Standard identification code applied by Method 1, 3, or 5. Fillers may be used as necessary to form a firm

well-rounded assembly.

Sixth - Aluminum foil/polyester tape/aluminum foil. 0.002-inch thick with 45 percent overlap.

Seventh - Braided shield of tin-coated copper. AWG and coverage as necessary to comply with

shield performance requirements.

Eighth - An optional binder.

Ninth - Cross-linked polyolefin jacket (see table I for wall thickness).
