Belden Copper Systems Provide Reliable, End-to-End Networking Performance

Belden understands that cabling is the core foundation of every network — its ability to provide high performance, reliable transmission is essential for carrying out day-to-day business operations. From critical data center links that connect network switches and servers, to horizontal and backbone links that deliver voice, data and video for a wide range of networking, communications, audio-visual, security and building management applications, Belden has the end-to-end copper cabling system to meet your current networking challenges while providing the bandwidth and scalability for the needs of the future.

Representing Networking Leadership at Every Turn

Three different levels of Belden Copper Systems are offered to meet customers' specific needs.

Belden Category 5E System

For networks requiring only basic performance, the Belden Category 5E System is the best performing Category 5E system available exceeds all requirements for Category 5E performance.

Ideal for budget-conscious and short-term investments, the Belden Category 5E System is robust enough to support a variety of basic business applications in standard environments, including basic PoE.

Belden Category 6 System

From transmitting large volumes of data throughout the LAN and data center, to today's advanced applications like Voice over IP (VoIP), video over IP, Power over Ethernet (PoE) Plus and IP-based security and building management systems, Belden Category 6 System supports a variety of environments and applications. With a wide range of components and accessories, enhanced crosstalk and impedance performance, combined with a compact size, makes end-to-end Belden Category 6 System the most cost-effective solution for high-traffic and high bit-rate applications throughout the LAN environment.

Belden Category 6A System

The Belden Category 6A System Category 6A System is an end-to-end copper system designed with dynamic enabling technologies to support the most demanding current and future high-end applications with performance beyond the TIA/EIA Category 6A standard. The Belden Category 6A System Category 6A System is an ideal long-term investment that will outlast several equipment and application upgrades. Combined with a host of patch panels, assemblies, connectors and accessories, as well as a pre-terminated system, the Category 6A System is the ideal solution for any current and future data center or horizontal cabling system.

The following is a recap of each of the three Belden Copper Systems.

Faster.
Easier.
Better.

Belden Copper Systems – Performance and Component Selection Matrix

Performance Standard	Category 6A	Category 6	Category 5E
Available Bandwidth	500 MHz	250 MHz	100 MHz
Cable Selection	Category 6A Series	Category 6 Series	Category 5E Series
Connectivity Selection	Category 6A IDC Cross-Connect	GigaBIX Cross-Connect	BIX and 110 Cross-Connect
	Category 6A Patch Panels Category 6A Modular Jacks Category 6A Modular Cords Category 6A Modular Coupler	Category 6+ Patch Panels Category 6+ Modular Jacks Category 6+ Modular Cords Category 6+ Modular Coupler	Category 5E Patch Panels Category 5E Modular Jacks Category 5E Modular Cords
	KeyConnect Patch Panels MediaFlex, KeyConnect, Interface <i>(Configurable with appropriate modules)</i>		

Belden Shielded Systems – Performance and Component Selection Matrix

Performance Standard	Category 6A	Category 6	Category 5E
Available Bandwidth	500 MHz	250 MHz	100 MHz
Cable Selection	Category 6A Shielded Series	Category 6 Shielded Series	Category 5E Shielded Series
Connectivity Selection	Category 6A Shielded Modular Jacks Category 6A Shielded Modular Cords	Category 6 Shielded Modular Jacks Category 6 Shielded Modular Cords	Category 5E Shielded Modular Jacks Category 5E Shielded Modular Cords
	KeyConnect Shielded Patch Panels MediaFlex Faceplates, KeyConnect Faceplates and Adapters <i>(Configurable with appropriate modules)</i>		

Top-quality Flagship Innovations Provide the Ultimate Value

Backed by years of field-proven telecommunications experience, Belden Copper System components include several innovative technologies designed to ensure cost-effective, easy deployment and maximum performance and reliability, while meeting current and future needs for capacity and scalability. These products are designed with the same focus on quality and performance found in Belden's complete product line.

Belden Bonded-Pair Cables

Available for each Copper System, Belden Bonded-Pair Cables feature a patented design that bonds the individual conductors along their longitudinal axis for extremely uniform spacing that maintains pair geometry and consistent electrical performance. With higher pulling tensions and tighter bend radii, Belden Bonded-Pair Cables are better suited to withstand the rigors of real-world installations and accommodate high-density data center applications that experience a great deal of cable bending in and around patch panels. Because Belden Bonded-Pair Cables avoid gaps along the twisted pairs, they provide improved return loss and balance performance that makes them less susceptible to electromagnetic and radio frequency interference (EMI/RFI) in noisy environments. This innovative Belden technology is ideal for high frequency 10 Gigabit and broadband video applications, as well as any mission-critical situation where dropped signals are not an option.

Pre-Terminated Cabling Systems

Ideal for data centers where time, reliability and performance are critical, Belden Pre-Terminated Cabling Systems are easy to configure, easy to order and easy to install. With an intuitive plug-and-play action, built-in reliability that virtually eliminates testing, and simple reusable components, Belden's Pre-Terminated Cabling Systems provide superior performance, save significant time and money and offer energy and waste savings. At the heart of these systems are two core components — pre-terminated cable assemblies and RJ45 modular couplers. The pre-terminated cable assemblies are a 6-cable bundle terminated with smaller footprint RJ45 plugs that provide easy pulling, routing, cable management and connection. Compatible with Belden's full line of KeyConnect modular patch panels, the RJ45 modular couplers are RJ45-to-RJ45 inline couplers designed to meet the performance requirements of a single plug-jack connection while offering the inherent simplicity of a true plug-and-play solution. The Belden Pre-Terminated Cabling Systems are available in unshielded and shielded Category 6A Pre-Terminated Cabling Systems for 10 Gigabit applications and Pre-terminated Cabling Solution for Category 6 performance.

There's a Belden Copper System that's right for you.

Faster.
Easier.
Better.

KeyConnect Modularity

Belden's KeyConnect System includes a wide range of KeyConnect patch panels, faceplates, adapters and boxes, combined with a complete line of KeyConnect Modules, including KeyConnect Modular Jacks available in Category 6A, Category 6+ and Category 5E to suit any network performance level. Each modular component of the KeyConnect series seamlessly fits together to accommodate any application—from the data center to the workstation. Designed with superior signal transmission performance, the compact KeyConnect Modules can be easily inserted and removed from any keystone-style opening, providing design flexibility, reduced installation time and the ability to reconfigure as needs change. For data centers and telecommunications rooms, modular KeyConnect Patch Panels can be preloaded or configured using any KeyConnect Modules for any level of density, including a 48-port/1U configuration. The modules can also be used

with front-loading Belden MediaFlex Outlets for mixing and matching with Multimedia Modules. KeyConnect components come in a variety of colors and styles, including more than 19 colors of jacks, stainless steel faceplates, single-gang and double-gang configurations, and boxes equipped with protective shutters.

Best Design and Installation Partners

Well positioned as a leading single-source provider, Belden's global network of top-quality distribution and fully-trained installation partners provide comprehensive local and global support from design, delivery and installation to post-installation support. Belden recruits and qualifies only the best design and installation partners as our authored Certified System Vendors (CSVs). Belden invests heavily in evaluating, training and qualifying our partners so they have the knowledge and expertise necessary to ensure that the design and installation of each Belden system is optimized for the required standards, technology environment and lifespan of the network.

Best-in-Class Support and Warranties

All Belden Systems are backed by expert service and technical support and a commitment to delivering high-performance, reliable transmission solutions. Belden backs certified systems with two unique best-in-class warranties for complete peace of mind — a 10-Year Product Warranty. From the date of installation, the 25-Year Performance Warranty Warrants the installed system will work as per the applicable standards requirements.

Category 6A Shielded System—KeyConnect Patch Panels, Modular Jacks and Cords	18-19
Category 6A Shielded Pre-Terminated Cabling System	20

The copper cabling system that does it all, the Belden Category 6A System supports the most demanding current and future high-end applications with performance beyond the minimum standard. The system is comprised of Category 6A System Cables, preloaded or modular Category 6A Patch Panels, Category 6A Modular Jacks and Category 6A Modular Cords. Together, these components form an end-to-end system that guarantees bandwidth to support full implementation of 10GBASE-T. A truly long-term investment, the Category 6A System is designed to outlast several equipment and application upgrades.

The Category 6A System is available in Pre-Terminated System that features proven modular components with superior performance and intuitive plug-and-play installation for saving significant time and money. For cross-connect and interconnect systems, the Category 6A IDC System is a high-performance, space-saving modular connection system. For harsher EMI environments, the Category 6A Shielded System and the Category 6A Shielded Pre-Terminated System provide a higher degree of noise immunity in a true end-to-end shielded system that maintains shielding integrity throughout the entire system.

Category 6A System is based on Belden's innovative enabling technologies.

MatriX IDC technology positions each IDC at a right angle to its adjacent IDC to cancel out Alien Crosstalk and provide stable high-performance in high-density environments.

X-Bar technology accurately positions each UTP pair prior to termination.

FlexPoint PCB technology positions the compensation circuitry in Category 6A Modular Jacks directly at the plug's point of contact for better crosstalk performance.

Bonded-Pair technology offers uniform spacing of conductors for exceptional structural stability and superior electrical performance.

Dual-Flex PCB technology in the RJ45 Coupler of the Category 6A Pre-Terminated Cabling Systems ensures an uninterrupted electrical path for enhanced reliability.

Up to 25% Space & Weight Savings

- 0.265" OD Category 6A cable (CMP)
- Improved shape for easier handling
- Durable, lightweight round construction

Optimized Electrical Performance

- Up to 10 dB of alien crosstalk headroom
- Exceeds TIA standards for full 100 m channels
- Superior crosstalk isolation and EMI suppression

Up to 25% Less Temperature Rise

- Delivers more than 100W from power source for 4-pair PoE
- More uniform heat dissipation and transfer
- Eliminates length de-rating up to 60°C

10GXS Cable Electrical Performance

(at maximum TIA frequency, 500MHz)

Parameter	TIA 568-C.2 Category 6A	10GXS	10GXS Min. Margin
Insertion Loss	45.3 dB	≤43.9 dB	3%
PSNEXT	31.8 dB	34.8 dB	3 dB
PSACR-F	10.8 dB	20.8 dB	10 dB
PSANEXT	52.0 dB	60.0 dB	8 dB
PSAACR-F	24.2 dB	34.2 dB	10 dB
Return Loss	15.2 dB	≥15.2 dB	Beyond Std

Key Applications

- 10GBASE-T Ethernet
- 1000BASE-T as well as 2.5G and 5G Ethernet
- PoE Type 1 (15 W), Type 2 (30 W), Type 3 (60 W), Type 4 (90 W)
- IEEE 802.11ac Wave 1 and Wave 2 High-Throughput Wi-Fi
- HDBaseT, Broadband (CATV) and High-Speed Internet (DOCSIS)

Patented EquiSpline™ Design

- Maintains equal distance between pairs and outer barrier along the cable to prevent noise coupling
- Retains more air space around individual pairs for better electrical performance
- Improves cable roundness and flexibility for easier handling during installation
- Ensures structural integrity for better electrical control, reliability and long-term installable performance
- Optimizes balance and consistent cable geometry for reduced bit error rates

EquiSpline™ Design

Simplicity and Elegance in Design

- **Smaller Diameter:** Saves up to 25% on space and weight
- **Fewer Twists:** Easier to separate pairs for faster installation
- **Round Structure:** EquiSpline™ ensures structural integrity and maintains distance between pairs
- **Smaller Bend Radius:** Accommodates tighter spaces and workstations
- **Easier Tape Removal:** Easy to remove barrier tape for faster installation

EquiBlock™ Barrier Technology

- Improves heat transfer and achieves uniform heat flow dissipation to eliminate hotspots in cable bundles when delivering remote power
- Maintains low insertion loss at elevated temperatures to reduce length de-rating for improved PoE performance
- Blocks noise coupling and electromagnetic radiation by effectively surrounding the conductors with a Faraday cage
- Provides an electromagnetic barrier without concern for ground loops or needing to terminate a shield to ground
- Suppresses antenna effect caused by common mode ANEXT and EMI

EquiBlock™ Barrier Effects

Category 6A UTP System Cable, 10 Gigabit Ethernet

Nonbonded-Pair and Bonded-Pair

The Category 6A Cable delivers performance that goes beyond the ANSI/TIA/EIA 568-C.2 Category 6A standard. When used as the horizontal cable within the Belden Category 6A System, it provides 500 MHz of proven channel bandwidth and a data rate of 10 Gigabits per second.

- 10GBASE-T Low Power Implementation (Short Reach Mode) (IEEE 802.3an)
- 1000BASE-T Applications (IEEE 802.3ab)
- Power Over Ethernet Plus - 2 pairs, up to 30 Watts or 4-pairs, up to 60 Watts (IEEE 802.3at)
- Power Over Ethernet - 2 pairs, up to 12.95 Watts (IEEE 802.3af)
- Broadband Video (CATV) & High Speed Internet (DOCSIS) over UTP up to 860 MHz

Applications:

- 10GBASE-T Full Power Implementation (IEEE 802.3an)

KeyConnect Angled Patch Panel, 48-port, 2U (Empty)

Flex Patch Panel (Empty)

The Category 6A Patch Panel is a fully loaded patch panel designed to be used within the Category 6A System. The Category 6A Patch Panel features the revolutionary 10GX Connector, specifically designed to meet the difficult challenges of 10 Gb/s transmission. Category 6A Patch Panels are available in high-density options such as 24 ports in 1U or 48 ports in 2U, but the phenomenal ANEXT performance of the 10GX Connector has allowed Belden to also support an ultra high-density option offering the Category 6A Ultra High-Density Patch Panel supporting 48 ports in 1U. The unmatched Beyond 10G™ performance exceeds all parameters specified in the Category 6A standard. All performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 625 MHz.

KeyConnect Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room

installations. The modular KeyConnect Patch Panels are available in 24-port/1U, 48-port/2U, 72-port/2U and 48-port/1U configurations.

The KeyConnect Patch Panel series also includes the unique AngleFlex Patch Panel available in 24-port/1U and 48-port/2U configurations. Patent-pending removable angled inserts provide intuitive left, right or bidirectional patch cord routing and more efficient switch connection. Angled inserts eliminate the need for horizontal cable management, for a 27% space savings per rack.

The KeyConnect and AngleFlex panels can be configured using Category 6A KeyConnect Modular Jacks or Multimedia Modules.

Category 6A Modular Jacks

KeyConnect Style

The 10GX Module is a revolutionary punch down UTP connector designed to be used within the Category 6A System. In order to achieve true 10G performance, Belden has designed the 10GX Module based on three revolutionary module technologies making the 10GX Module the most advanced 10G module available. The unmatched Beyond 10G™ performance exceeds all parameters specified in the Category 6A standard. All performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 625 MHz. when used along with 10GX cables and connectivity.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

Category 6A Traceable Patch Cords

Bonded-Pair Patch Cords

Unique Features

Belden Traceable Bonded-Pair Patch Cords have several unique features that make them an exceptional alternative to other patch cords on the market. They feature a highly-efficient and bright LED with a battery life expectancy of seven years, or 1,000 activations (battery is also replaceable). When activated, the LED blinks for 20 seconds and can be stopped at any time with a second press of the button. The LED and its tracing wires are integrated right into the patch cord, eliminating the need for a separate power source.

Key Specifications

- Available in CAT6A and CAT6+ for end-to-end Belden Category 6A systems
- Exceptionally bright, efficient LED light for easy identification in both bright and dark environments
- Belden Bonded-Pair technology for extra robustness, performance and reliability
- Bar code tagging on each end of the cord compatible with DCIM systems

- Low-profile plug boot supports ultra-high density 48-port 1U patch panels
- 100% factory tested and certified for Category 6A and Category 6
- Replaceable battery with 7-year life expectancy or 1,000 activations
- Available in a variety of colors and sizes, with custom lengths available to 250 feet
- Backed by superior support and a Belden 25-year Certified System Warranty

Category 6A Modular Cords

Nonbonded-Pair Cords and Pigtails

Belden's 6A modular copper cords are designed to be used as part of Belden copper systems in data centers or telecommunications rooms, where they can provide patch panel or equipment connections, consolidation point connections, or telecommunications outlet or MUTOA connections. Their unmatched performance exceeds all parameters specified in the Category 6A standard and all performance characteristics have been set to guarantee transmission performance up to 625 MHz. when used along with 10GX cables and connectivity.

Built with improved strain relief and a flexible boot for optimum protection in high-density installations, they feature a wrap-around label on each cord for easier product identification and length sorting and new vibrant patch cord colors to match the Belden range of horizontal cables.

Modular Cord Configuration Matrices

These matrices can be used to build the part number for any Modular Cord configuration. Refer back to these matrices as needed, when designing Category 6 (Section Two) and Category 5E systems (Section Three).

Patch Cords Part Number Example:

CA24106003M is: 10GX Patch Cord, 4 pair 26 AWG, Stranded, LSZH, T568A/B-T568A/B, Blue, 3 Mts

Performance	Cable	Termination	Standard Color	Length
Patch Cords				
UTP & STP				
10GX UTP = CA	LSNH = 24	T568A/B - T568A/B = 1	Red = 02	0.5 m = 0D5M
	PVC = 99		Orange = 03	1.0 m = 001M
			Yellow = 04	2.0 m = 002M
			Green = 05	3.0 m = 003M
			Blue = 06	5.0 m = 005M
			Purple = 07	10.0 m = 010M
			Grey = 08	
			White = 09	
			Black = 00	
CAT5E UTP = C5P	LSNH = 4	T568A/B - T568A/B = 1	Red = 02	2 ft - 65 ft = 002F - 065F
CAT5E STP = C5C	PVC = 9		Orange = 03	1 m - 20 m = 001M - 020M
CAT6 UTP = C6P			Yellow = 04	
CAT6 STP = C6C			Green = 05	
CAT6A STP = CAC			Blue = 06	
			Purple = 07	
			Grey = 08	
			White = 09	
			Black = 10	

Pigtails Part Number Example:

C6P4304002M CAT6 Pigtail, Nonbonded-Pair, 4-Pair, 24AWG, LSZH, T568B-Open, Yellow, 2m

Performance	Cable	Termination	Standard Color	Length for 10GX
10GX = CA	10GX Bonded-Pair, Solid, CMR = 21	T568A-Open = 2	Red = 02	20 ft (6.1m) = 020
	10GX Bonded-Pair, Solid, CMP = 22		Orange = 03	25 ft (7.6m) = 025
CAT5E UTP = C5P	LSNH = 4	T568B-Open = 3	Yellow = 04	35 ft (10.6m) = 035
CAT5E STP = C5C	PVC = 9		Green = 05	50 ft (15.2m) = 050
CAT6 UTP = C6P			Blue = 06	75 ft (22.9m) = 075
CAT6 STP = C6C			Purple = 07	100 ft (30.5m) = 100
CAT6A STP = CAC			Gray = 08	Length (exclude 10GX)
			White = 09	2 ft - 65 ft = 002F - 065F
			Black = 00	1 m - 20 m = 001M - 020M
			TIA 606 Color	
			Red = 12	
			Orange = 13	
			Yellow = 14	
			Green = 15	
			Blue = 16	
			Purple = 17	

* TIA 606 Color is only for 10GX series

Crossover Patch Cords Part Number Example:

C501502010 is CAT5E Patch Cord, Bonded-Pair, 4-pair, 24 AWG Solid, CMR, Crossover IEEE, Red, 10 ft (3.0 m)

Performance	Cable	Termination	Standard Color	Length
10GX = CA	10GX Bonded-Pair, Solid, CMR = 21	Crossover T568A-T568B = 4	Red = 02	1 ft (0.3 m) = 001
	10GX Bonded-Pair, Solid, CMP = 22		Yellow = 04	2 ft (0.6 m) = 002
CAT6+ = C6	C6/5 Bonded-Pair, Solid, CMR = 01	Crossover IEEE = 5	Purple = 07	3 ft (0.9 m) = 003
CAT5E = C5	C6/5 Bonded-Pair, Solid, CMP = 02	Rollover = 6	White = 09	4 ft (1.2 m) = 004
			Blue = 06	5 ft (1.5 m) = 005
			Black = 00	6 ft (1.8 m) = 006
				7 ft (2.1 m) = 007
				8 ft (2.4 m) = 008
				9 ft (2.7 m) = 009

Category 6A Pre-Terminated Cabling System

Cable Assemblies, Couplers, Patch Panels

The Category 6A Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6A performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy their high-performance 10 Gigabit networks with optimal speed and efficiency.

Proven modular components are the cornerstone of the system. These include the Category 6A Pre-Terminated Cable Assemblies and the Category 6A RJ45 Modular Couplers. These components rely on unique enabling technologies: Belden's Bonded-Pair

technologies ensure that the cable assemblies boast exceptional structural stability and unfailing electrical performance; and the patent-pending Dual-Flex design ensures controlled plug/jack mated connection on both sides of the coupler to provide an uninterrupted electrical path for superior connector reliability and transmission performance.

With simple planning, easy ordering and rapid delivery, the Category 6A Pre-Terminated Cabling System can reduce installation time and labor costs by as much as 90 percent. In addition, this "green" system provides for plug-and-play installation and component reusability, resulting in lower installed cost and less waste.

Category 6A IDC System

Connecting Components, Accessories, X-Connect Cable

The Belden Category 6A IDC System is a high-performance, space-efficient modular connection system. The system meets the TIA/EIA 568-C.2 standard, plus it is uniquely engineered to deliver unmatched 10G performance — handling 10GBase-T data networking and multimedia applications with headroom to spare.

The Category 6A IDC System is extremely flexible in that it accommodates the configuration of large cross-connect systems and the configuration of interconnect systems within racks. Because of its modularity, the system also accommodates future moves, adds and changes (MACs) with ease.

F/UTP Cable, Category 6A

Nonbonded-Pair and Bonded-Pair

This Category 6A shielded cable delivers performance that goes beyond the ANSI/TIA/EIA 568-C.2 Category 6A standard. When used as the horizontal cable within the Belden Category 6A Shielded System, it provides proven channel bandwidth and a data rate of 10 Gigabits per second. With a thick, 100% coverage foil shield, your 10 Gb/s of data is protected from harsh EMI environments.

Adding a shield to a high performance Category 6A cable is not as easy as one would think. Any metallic shield changes the electrical performance of the cable, and if the shield is not smooth, that performance becomes unpredictable.

Applications:

- 10GBASE-T, and any other Ethernet application in high noise environments (EMI)
- 10GBASE-T Full Power Implementation (IEEE 802.3an)
- 10GBASE-T Low Power Implementation (Short Reach Mode) (IEEE 802.3an)
- 1000BASE-T Applications (IEEE 802.3ab)
- Power Over Ethernet Plus - 2 pairs, up to 30 Watts or 4-pairs, up to 60 Watts (IEEE 802.3at)
- Power Over Ethernet - 2 pairs, up to 12.95 Watts (IEEE 802.3af)
- Broadband Video (CATV) and High Speed Internet (DOCSIS) over UTP up to 860 MHz
- High Temperature performance up to 50°C without length de-rating for 1000BASE-T and 100BASE-TX

Category 6A Shielded System (continued) KeyConnect Patch Panels, Modular Jacks and Cords

Category 6A Shielded Modular Patch Panel (Empty)

KeyConnect Shielded Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. They come with a ground wire to guarantee shielding integrity (per TIA-607-B) and cable management brackets for neat cable dressing. The KeyConnect Shielded Patch Panels can be configured using Category 6A Shielded Modular Jacks or any other KeyConnect modules.

The Category 6A Shielded KeyConnect Jack is a rugged tool-less connector designed to be

used within the Belden Category 6A Shielded System. Its 2-piece die-cast housing and its shielding lug provide a reliable shield and 360 degree durable bonding to the cable foil.

Category 6A Modular Cord are designed around a patent pending plug management bar design which allows for very good control of the internal plug NEXT. The cord design offers excellent alien crosstalk performance, while maintaining flexibility. The system's unmatched performance exceeds all parameters specified in the Category 6A standard.

Category 6A Shielded Pre-Terminated Cabling System

Cable Assemblies, Couplers, Patch Panels, Cords

Category 6A Shielded Pre-Terminated Cable System

Category 6A Shielded KeyConnect RJ45 Coupler

The Category 6A Shielded Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6A performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy their high-performance 10 Gigabit networks with optimal speed and efficiency. Proven modular components are the cornerstone of the system. These include the Category 6A Shielded Pre-Terminated Cable Assemblies and the Category 6A Shielded RJ45 Modular Couplers. These components rely on unique enabling technologies: Belden's Bonded-Pair

technologies ensure that the cable assemblies boast exceptional structural stability and unfailing electrical performance; and the patent-pending Dual-FleX design ensures controlled plug/jack mated connection on both sides of the coupler to provide an uninterrupted electrical path for superior connector reliability and transmission performance.

With simple planning, easy ordering and rapid delivery, the Category 6A Shielded Pre-Terminated Cabling System will drastically reduce installation time and labor cost. In addition, this "green" system provides for plug-and-play installation and component reusability, resulting in lower installation cost and less waste.

Belden offers three beyond-standards Category 6 copper systems to support a variety of price-performance ratios, applications, environments and operational life spans—Belden Category 6 Systems. Each Category 6 system is comprised of DataTwist Cable with various guaranteed bandwidth levels and application recommendations, preloaded and modular KeyConnect Patch Panels, CAT6+ Modular Jacks and CAT6+ Modular Cords.

4800 System is the highest performing Category 6 system available with guaranteed bandwidth to 300 MHz and exceptional signal power and signal-to-noise performance that exceeds TIA/EIA Category 6 requirements.

3600 System offers the best price-performance ratio of any end-to-end Category 6 system on the market. With guaranteed performance to 280 MHz, IBDN 3600 System offers headroom beyond the TIA/EIA Category 6 standard.

Belden Category 6 System offers a guaranteed performance based on EIA/TIA Standards for gigabit applications.

Belden's 3600 Pre-Terminated Cabling System features proven modular components and an intuitive plug-and-play installation that deliver rapid deployment and guaranteed Category 6 performance and headroom.

Based on proven reliable BIX technology, the space-savings GigaBIX Category 6 Cross-Connect System offers easy installation and cable management for high-density applications.

With Shielded Cables, Shielded Patch Panels and Category 6+ Shielded Modular Jacks and Cords, Belden also offers an end-to-end Category 6 shielded system that provides better noise immunity to improve data throughput in harsh EMI environments.

DataTwist 4800 UTP Cable, Category 6

Nonbonded-Pair and Bonded-Pair

DataTwist 4800 UTP Cable

DataTwist 4800, part of the 4800 System, is a UTP cable engineered specifically to perform well beyond ANSI/TIA/EIA-568-C.2 Category 6 requirements. DataTwist 4800 Cables can be specified in either Nonbonded-Pair design or in Belden's exclusive Bonded-Pair construction. All DataTwist 4800 Cables are designed to provide low Insertion Loss (low signal Attenuation). This characteristic enables increased signal power over a higher range of frequencies. This strong signal translates into maximum headroom and more robust transmission for today's applications as well as a capacity for those of tomorrow's networks. The higher signal power of

DataTwist 4800 Cables also results in a higher PSACR. With this higher ratio, 4800 Cables are able to provide fewer transmission errors and higher data rate capability.

DataTwist 4800 with Bonded-Pair technology is fully characterized with guaranteed performance to 600 MHz. Available in plenum and non-plenum versions, DataTwist 4800 with Bonded-Pair technology provides a greater amount of headroom, enabling the structured cabling system to deliver guaranteed performance even when unforeseen circumstances arise.

DataTwist 4800 UTP Cable

DataTwist 3600 Cable, Category 6 Nonbonded-Pair and Bonded-Pair

DataTwist 3600 Cable

DataTwist 3600 UTP Cables provide increased bandwidth and signal-to-noise margins. Their smaller diameter and high performance make possible the unique Category 6 networking solution: Belden IBDN 3600 System.

DataTwist 3600 UTP Cables have descending-distance marking for cable length that reduces waste. Matching tip and ring color code for ease of installation. Available in Spool-in-Box packaging for ease of installation, handling, and inventory management.

Features

- Central spline design separates pairs and maintains stable pair position, thus improving crosstalk and impedance/RL performance
- Increased bandwidth and signal-to-noise margins
- Optimized balance of transmission performance for simultaneous parallel transmission protocols
- Size minimized for compactness of installations
- Larger 23 AWG conductors are ideal for PoE and PoE+ applications

DataTwist 3600 Cable

Category 6 Cable

Nonbonded-Pair

Category 6 Cable

Category Cable consists of 4-pair UTP cables that exceed Category 6 requirements as per ANSI/TIA/EIA-568-C.2. When used as

the horizontal cable in the Belden Category 6 System, it provides at least 250 MHz of bandwidth.

MediaTwist UTP Cable, Category 6 Bonded-Pair

MediaTwist, part of the Category 6 System, is engineered to exceed the ANSI/TIA/EIA-568-C.2 Category 6 requirements. The exceptional physical uniformity of MediaTwist translates into premier electrical performance benefits for users. Available in plenum and non-plenum versions, MediaTwist has taken Bonded-Pair technology a step further.

Its unique crescent-shape design ensures that pair-to-pair movement is minimized during installation. The innovative design of MediaTwist provides stable crosstalk and impedance performance both before and after installation. This results in improved signal integrity and reduced signal radiation, making MediaTwist an excellent choice for your Category 6 cable.

KeyConnect Patch Panels, Category 6

Preloaded and Modular

CAT6+ KeyConnect Patch Panels (Preloaded)

KeyConnect Patch Panels (Empty)

KeyConnect AngleFlex Patch Panels

The KeyConnect Patch Panel Series is a comprehensive line of robust all-metal, preloaded and modular patch panels. The series provides a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The preloaded KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U configurations with CAT6+ KeyConnect Modular Jacks. The -SCM option has shorter cable management brackets. The modular KeyConnect Patch Panels are available in 24-port/1U, 48-port/1U, 48-port/2U, 72-port/2U, and 96-port/3U configurations.

The KeyConnect Patch Panel series also includes the unique AngleFlex Patch Panel available in 24-port/1U and 48-port/2U

configurations. Patent-pending removable angled inserts provide intuitive left, right or bi-directional patch cord routing and more efficient switch connection. Angled inserts eliminate the need for horizontal cable management, for a 27% space savings per rack.

The KeyConnect and AngleFlex panels can be configured using CAT6+ KeyConnect Modular Jacks or Multimedia Modules. The KeyConnect Angled Patch Panels (v-shape) are available in preloaded and empty configurations.

The Flex Patch Panel series is available in 24-port/1U and 48-port/2U configurations, and is designed to be populated using CAT6+ Modular Jacks or Multimedia Modules.

CAT6+ Modular Jacks

KeyConnect

The CAT6+ Modular Jack is a punch down UTP connector based on a patented Encapsulated Lead Frame technology that ensures excellent long-term reliability as well as extremely stable transmission performance. They are designed to be used within the Belden Category 6A Systems. The Beyond Category 6 performance exceeds all parameters specified in the Category 6 standard. All performance characteristics have been set to guarantee transmission performance up to 300 MHz and a data-rate of up to 4.8 Gb/s.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT6+ Traceable Patch Cords

Bonded-Pair Patch Cords

Unique Features

Belden Traceable Bonded-Pair Patch Cords have several unique features that make them an exceptional alternative to other patch cords on the market. They feature a highly-efficient and bright LED with a battery life expectancy of seven years, or 1,000 activations (battery is also replaceable). When activated, the LED blinks for 20 seconds and can be stopped at any time with a second press of the button. The LED and its tracing wires are integrated right into the patch cord, eliminating the need for a separate power source.

Key Specifications

- Available in 10GX and CAT6+ for end-to-end Belden 10GX, 4800, 3600 and 2400 systems
- Exceptionally bright, efficient LED light for easy identification in both bright and dark environments
- Belden Bonded-Pair technology for extra robustness, performance and reliability
- Bar code tagging on each end of the cord compatible with DCIM systems

- Low-profile plug boot supports ultra-high density 48-port 1U patch panels
- 100% factory tested and certified for Category 6A and Category 6
- Replaceable battery with 7-year life expectancy or 1,000 activations
- Available in a variety of colors and sizes, with custom lengths available to 250 feet
- Backed by superior support and a Belden 25-year IBDN Certified System Warranty

CAT6 UTP Modular Cords

Nonbonded-Pair Patch Cords

The CAT6+ Series of Patch Cords are made with Belden's. High performance stranded patch cables. These modular cords offer the best combination of transmission performance and physical integrity.

Features

- Stranded conductors improve Flexibility
- Improved strain relief and a flexible boot for optimum protection in high-density installations

Benefits

- Exceeds TIA and ISO transmission and mechanical performance requirements

3600 Pre-Terminated Cabling System

Cable Assemblies, Couplers, Patch Panels

3600 Pre-Terminated Cable Assembly

Belden's 3600 Pre-Terminated Cabling System delivers rapid deployment coupled with guaranteed Category 6 performance and headroom, without the need for tradeoffs or compromise in performance and reliability. Bringing a new level of ease and convenience to cabling system design, ordering and installation, the system allows users to deploy their high-performance cabling networks with optimal speed and efficiency.

Proven modular components are the cornerstone of the system. These include the 3600 Pre-Terminated Cable Assemblies and the CAT6+ RJ45 Modular Couplers. These components rely on unique enabling

technologies: Belden's Bonded-Pair technologies ensure that the cable assemblies boast exceptional structural stability and unflinching electrical performance; and the patent-pending plug management bar design which allows for very good control of the internal plug NEXT and superior plug/jack mated-pair performance.

With simple planning, easy ordering and rapid delivery, the 3600 Pre-Terminated Cabling System can reduce installation time and labor costs by as much as 90 percent. In addition, this "green" system provides for plug-and-play installation and component reusability, resulting in lower installed cost and less waste.

GigaBIX IDC System, Category 6

Kits, Components, Patch Cords and Accessories

The Belden GigaBIX Cross-Connect System takes advantage of the proven reliability of BIX technology to provide high-performance connections for data networks. This uniquely designed system allows for very high termination density, while maintaining optimal ease of administration to accommodate moves, adds and changes.

Advantages of the Belden GigaBIX Cross-Connect System include easy installation and cable management, coupled with the industry's best performance-to-price ratio for high-density connectivity. The system allows up to 300 pairs to be terminated in a very small area—a real space-saving advantage in today's office environment where real estate is at a premium.

DataTwist 7815A Shielded Cable, Category 6

Nonbonded-Pair

DataTwist 2400 Shielded Cable

Shielded Cable consists of 4-pair F/UTP cables that exceed Category 6 requirements as per ANSI/TIA/EIA-568-C.2. When used as the horizontal cable in the Belden Shielded System, the channel provides at least 250 MHz of

bandwidth. DataTwist 2400 F/UTP shielded cable has a thick, 100% coverage foil shield. This shield protects your system from harsh EMI environments improving your data throughput.

Category 6 Shielded Cable

CAT6+ Shielded Patch Panels and Shielded Modular Jacks

KeyConnect and Modular

KeyConnect Shielded Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The modular KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U and are complete with a ground wire and cable management brackets to guarantee shielding integrity (per TIA-607-B) and neat cable dressing. The KeyConnect Shielded Patch Panels can be configured using 10GX Shielded Modular Jacks or any other KeyConnect modules.

The CAT6+ Shielded KeyConnect Modular Jack is a rugged tool-less connector designed to be used within the Belden 2400 Shielded System.

Its 2-piece die-cast housing and its shielding lug provide a reliable shield and 360 degree durable bonding to the cable foil. Its color-coded wire guide speeds up pair placement and terminates all pairs when closing the 2-piece housing.

The excellent CAT6+ performance exceeds all parameters specified in the TIA Category 6 standard. Its performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 250 MHz with a 10 dB margin on PSANEXT and PSAACRF. Its keystone footprint makes it compatible with KeyConnect and MediaFlex Workstation Outlets.

CAT6 Shielded Modular Cords

Patch Cords and Pigtails

The CAT6 Shielded Modular Cords are 4-pair 24 AWG F/UTP modular cords designed to be used within the Belden Shielded System. These modular cords offer the best combination of transmission performance and shielding integrity.

Features

- Made with small diameter for greater flexibility and higher density installations
- Stranded conductors 24 AWG improve and are needed in long patch cords and
- Improved strain relief and a flexible boot for optimum protection in high-density installations

Benefits

- Exceeds TIA transmission and mechanical performance requirements

The Category 5E System is the best performing Category 5E system available, exceeding all requirements for Category 5E performance with guaranteed bandwidth to 100 MHz. The system is comprised of Nonbonded-Pair or Bonded-Pair DataTwist CAT5E Cable, KeyConnect Patch Panels and CAT5E Modular Jacks and Cords. A BIX Cross-Connect System, 110 Cross-Connect System and end-to-end shielded system are also available as part of Belden's comprehensive Category 5E offering. The Category 5E System features several Belden innovations that ease installation and management, ensure maximum performance and support a variety of environments.

DataTwist CAT5E Banana Peel® Enhanced Category 5E Cable uses a unique patented design that bundles six DataTwist Bonded-Pair Category 5E Cables to a center spline, offering a smaller size for easier termination and installation.

CAT5E KeyConnect Modular Jacks feature patented Encapsulated Lead Frame technology that offers excellent long-term reliability as well as extremely stable transmission performance.

CAT5E HD Patch Panels combine punch down connectors with standard modular jacks to speed installation. CAT5E HD Patch Boxes, available in BIX and 110 configurations, hold a 12-port universal connector module in a compact and robust metal enclosure.

KeyConnect Patch Panels, Category 5E

Preloaded and Modular

CAT5E HD Patch Panels

The CAT5E HD Patch Panels are robust and installer-friendly products by design, combining punch down connectors with standard modular jacks. The 12-port connector modules are available in both BIX and 110 Insulation Displacement Connection (IDC) options. CAT5E HD Patch Panels offer Category 5e performance and are designed to be used with the Belden Category 5E System.

The KeyConnect Patch Panels are a comprehensive line of robust all-metal, preloaded and modular patch panels.

The series provides a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations.

The modular KeyConnect Patch Panels are available in 24-port/1U, 48-port/2U, 72-port/2U and 48-port/1U configurations. Belden's unique KeyConnect AngleFlex Patch Panels are also available in 24-port/1U and 48-port/2U and offer better port-density and patch cord manageability. These panels can be configured using any KeyConnect UTP or Multimedia Modules.

Patch Panels, Category 5e (continued)

HD Patch Boxes

The CAT5E HD Patch Boxes are available in BIX and 110 configurations and hold one 12-port universal connector module in a compact and robust metal enclosure. The patch box features a hinged cover and support brackets to secure cables and maintain patch cord bend radius.

An MDVO Patch Box is also available that can be custom configured in the field using up to 12 MDVO-Style Modular Jacks or MDVO Multimedia Modules. Modules are ordered separately.

CAT5E Patch Boxes

Description	Belden Part Number
CAT5E HD and MDVO Patch Boxes	
CAT5E HD-BIX Patch Box, 12-port, Black, T568A/B	AX100284

CAT5E Modular Jacks

KeyConnect

CAT5E KeyConnect Modular Jack

The CAT5E Modular Jack is a punch down UTP connector based on a patented Encapsulated Lead Frame technology that ensures excellent long-term reliability as well as extremely stable transmission performance. They are designed to be used within the Belden Category 5E System. The Category 5E performance exceeds all parameters specified in the Category 5E standard. All performance characteristics have been set to guarantee transmission performance up to 160 MHz and a data-rate of up to 1.2 Gb/s.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT5E EZ Modular Jacks

KeyConnect

The EZ Module is built with a patented lead frame design and encapsulated insulation displacement contacts, ensuring reliable connections and performance well above Category 5e standards. The EZ module termination cap is what is so unique about this product. It allows for a simple and fast "press-fit" installation while ensuring consistent wire termination every time it is snap-locked. The module termination cap is color-coded to facilitate wire arrangement and speed up installation time. The termination cap is printed with the T568A/B color-codes.

The KeyConnect version has a keystone footprint, and is designed to be used with KeyConnect and AngleFlex Patch Panels and with KeyConnect and MediaFlex Workstation Outlets. The Style is designed to be used with Flex Patch Panels as well as Interface and MediaFlex Workstation Outlets. The modular jacks can also be mixed and matched with a wide variety of adapters and boxes to suit practically any installation configuration for workstation outlet, consolidation point and telecommunications closet applications.

CAT5E Modular Cords

Nonbonded-Pair

CAT5E Patch Cords

The CAT5E Series of Patch Cords are made with Belden's patented robust design cables. These modular cords offer the best

combination of transmission performance and physical integrity.

Features

- Solid conductors improve attenuation and are needed in long patch cords and pigtails to eliminate the need for cable de-rating in open-office cabling
- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around label on each cord for easier product identification and length sorting

BIX Cross-Connect System

Components, Patch Cords, Wires and Accessories

The Belden IBDN BIX Cross-Connect System takes advantage of the proven reliability of BIX technology to provide high-performance connections for voice and data networks. This uniquely designed system allows for very high termination density, while maintaining optimal ease of administration to accommodate MACs.

Advantages of the Belden IBDN BIX Cross-Connect System include easy installation and cable management, coupled with the industry's best performance-to-price ratio for high-density connectivity. The system allows for multiple mounting options of various connectors used in voice and data distribution systems.

Shielded Cable, Category 5E

Preloaded and Modular

Shielded Cable consists of 4-pair F/UTP cables as per TIA/EIA-568-B.2. When used as the horizontal cable in the Belden Shielded system, the channel provides at least 100 MHz of bandwidth. F/UTP shielded cable has a thick, 100% coverage foil shield.

Applications : Premise Horizontal Cable, Gigabit Ethernet, 100Base TX, 100Base VG ANYLAN, 155ATM, 622ATM, NTSC/PAL Component or Composite Video, AES/EBU, Digital Video , RS-422

CAT5E Shielded Patch Panels and Shielded Modular Jacks

KeyConnect and Modular

Shielded Modular Patch Panel (Empty)

KeyConnect Shielded Patch Panels are robust all-metal modular patch panels that provide a flexible, versatile and high-density termination solution for Data Center and Telecommunications Room installations. The modular KeyConnect Patch Panels are available in 24-port/1U and 48-port/2U and are complete with a ground wire and cable management brackets to guarantee shielding integrity (per TIA-607-B) and neat cable dressing. The KeyConnect Shielded Patch Panels can be configured using 10GX Shielded Modular Jacks or any other KeyConnect modules.

The CAT5E Shielded KeyConnect Modular Jack is a rugged tool-less connector designed to be used within the Belden 1200 Shielded

System. Its 2-piece die-cast housing and its shielding lug provide a reliable shield and 360 degree durable bonding to the cable foil. Its color-coded wire guide speeds up pair placement and terminates all pairs when closing the 2-piece housing.

The excellent CAT5E performance exceeds all parameters specified in the TIA Category 5e standard. Its performance characteristics including ANEXT, NEXT, FEXT, Insertion Loss and Return Loss have been set to guarantee transmission performance up to 160 MHz with a 10 dB margin on PSANEXT and PSAACRF. Its keystone footprint makes it compatible with KeyConnect Shielded Patch Panels and with KeyConnect and MediaFlex Workstation Outlets.

CAT5E Shielded Modular Cords Patch Cords and Pigtails

The CAT5E Shielded Modular Cords are 4-pair 26 AWG F/UTP modular cords designed to be used within the Belden Shielded System. These modular cords offer the best combination of transmission performance and shielding integrity.

- Improved strain relief and a flexible boot for optimum protection in high-density installations
- Wrap-around label on each cord for easier product identification and length sorting

CAT5E Shielded Modular Cord

Features

- Made with small diameter for greater flexibility and higher density installations

Benefits

- Exceeds TIA transmission and mechanical performance requirements

Belden offers a wide variety of workstation outlet systems designed for maximum flexibility, durability, aesthetics and manageability. These systems are available using Belden KeyConnect modularity and MediaFlex flexibility options. They come in a wide range of styles, colors and configurations, including single-gang and double-gang faceplates, stainless steel faceplates, adapters and boxes and multimedia outlets and inserts. Several innovative tools and accessories that ease termination and simplify network administration are also available.

KeyConnect Series feature a variety of faceplates, adapters and boxes that are compatible with all KeyConnect UTP and Multimedia Modules. Each modular component of the KeyConnect Workstation Outlet System seamlessly fits together to accommodate any surface mount, furniture or standard electrical plate outlet installation.

The LabelFlex Solution simplifies network management by enabling installers to quickly produce application specific labels for most Belden products, including Modular Jack Connectors, Cross-Connect Systems, Patch Panels, KeyConnect series, MediaFlex series and cable applications.

MediaFlex Series include a full line of modular faceplates, adapter boxes and inserts that offer the ultimate flexibility in configuring multimedia workstation outlets. They feature a front access design that allows inserts to be easily snapped in and out of openings for fast installation and upgrades.

Workstation Outlets

KeyConnect Faceplates

Compatible with all KeyConnect UTP and Multimedia Modules, KeyConnect Faceplates are designed for maximum flexibility, durability, aesthetics and manageability. They are available in a variety of styles, colors and port configurations to meet all work area outlet application needs, and they provide for easy outlet identification.

Features & Benefits:

- KeyConnect Faceplates are compatible with all KeyConnect jacks and multimedia modules
- KeyConnect Faceplates are available in almond and electrical white to suit any office decor
 - Fire-retardant plastic with UV stabilizer for protection against color degradation
 - Top and bottom labeling windows for easy outlet identification
 - Compatible with LabelFlex labeling solution
- KeyConnect Faceplates are available in stainless steel finish for institutional applications
- KeyConnect Faceplates are available with mounting studs for wall-mount phone installation
 - Available in stainless steel and white plastic

MediaFlex Faceplate Kits

The MediaFlex Faceplate Kits are offered for both KeyConnect and for MDVO-Style Modules.

The MediaFlex Faceplate Kit for KeyConnect Modules offers flexibility in configuring multimedia workstation outlets for current and future network needs. The front access design of the outlets offers easy installation and upgrades while multiple colors, Single-gang

and Double-gang configurations and labeling capabilities meet work area aesthetics, density and identification needs.

The MDVO pre-configured MediaFlex Faceplate Kits include a plate, flush MDVO-style inserts, filler inserts, MDVO blank, labeling window covers, labeling paper and all necessary mounting screws.

Workstation Outlets (continued)

MediaFlex Plates, Adapter Boxes and Accessories

MediaFlex Plates are one part of the comprehensive line of plates and inserts that snap together to create a full line of modular workstation outlets.

MediaFlex Plates can be mounted over standard NEMA type outlet boxes and rings to provide support for a variety of MediaFlex Adapters and Inserts. The fully modular construction combined with the front access design provides extensive configuration flexibility for current and future network needs. MediaFlex Plates are available in Single-gang and Double-gang configurations.

The Double-gang faceplate comes with a stand-off ring included in the package. This ring allows for easy mounting with virtually any industry electrical box or mud/adaptor rings, therefore providing added installation flexibility.

Each plate has the capacity of up to 6 ports per Single-gang and 12 ports per Double-gang.

MediaFlex Surface Adapter Boxes can be mounted over standard NEMA type outlet boxes and rings to provide support for the MediaFlex plates. The MediaFlex Surface Adapter Boxes are available as a Double gang configuration. The double gang box allows more room for cable management and bend radius control.

Workstation Outlets (continued) MediaFlex Inserts

MediaFlex Inserts for KeyConnect Modules: AX102410, Flush, 2-port, Almond and AX102412, Angled, 2-Port, Almond

MediaFlex Module Inserts along with MediaFlex Multimedia Inserts and MediaFlex Filler Inserts allow for the easy configuration of outlets. All inserts are front loaded and easily snapped in and out of the MediaFlex Plates for simple installation and maintenance. MediaFlex Module Inserts are available in a 2-port configuration in both Flush and Angled versions for KeyConnect-Style and MDVO-Style Modules. The inserts

are two units high for the flush version and three units high for the angled version. Therefore three flush inserts or two angled inserts are required to fully populate a Single-gang MediaFlex Plate.

MediaFlex Filler Inserts are used to fill the unused spaces in low density workstation outlets. They are available in one unit and two unit sizes.

Workstation Outlets (continued)

MediaFlex Inserts

MediaFlex Multimedia Inserts provide optimum flexibility in configuring multimedia workstation outlets that respond to any present or future network needs. MediaFlex Multimedia Inserts along with other MediaFlex Inserts allow for easy configuration of outlets. All inserts are front loaded and easily snapped in and out of the MediaFlex Plates for easy installation and maintenance.

MediaFlex Multimedia Inserts are available in Angled versions only in order to allow for proper management of cable bend radius. The inserts are three units high, therefore two inserts are required to fully populate a Single-gang faceplate and four inserts will fully populate a Double-gang faceplate.

Belden's new faceplate (86x86) range to complete IBDN® workstations quickly and efficiently, with the added benefit of installation flexibility, and uniform aesthetics.

Plenty of Choice for Maximum Flexibility

The Belden faceplate range offers a choice of five faceplates, and two styles. The Faceplates are capable of accepting Cat 5e, Cat 6 and Cat 6a type of modular jack, in Keystone style. These new faceplates can be either wallmounted on an appropriate wall back box or underfloormounted in floor faceplates and are available in Electric White color.

Durability and Reliability

All Belden faceplates are designed to provide maximum durability, protection and reliable performance. They feature a sturdy design for impact resistance, made from the best quality ABS. They include a shutter to protect modules from dust and debris and provide optimum performance, density and durability, while inserts and adapters are easily released for further configurations. Label windows are situated at the top part of the faceplates, so that the cords do not block the labels. This facilitates easy identification, avoiding labels at the bottom where they could not easily be seen after installation.

Workstation Outlets (continued)

Interface Surface Adapter Boxes, MDVO Adapters

The Interface/MDVO Surface Adapter Box allows surface mounting of Interface Plates as well as MDVO Flush and Angled entry faceplates. The box can be mounted on any flat surface or can be attached to standard electrical boxes or wall-mounting hardware for additional storage space ordered separately.

The MDVO 106 Adapters are designed for installations using standard NEMA electrical-

style faceplates also referred to as 106-type or duplex wall plates.

The MDVO Deco Adapter is designed for installations using Decora style wall plates.

MDVO Modular Furniture Adapters are the ideal outlet adapters for open office furniture applications.

Workstation Outlets (continued) Multimedia Outlet Boxes and Modules

A0643206, MDVO Multimedia Outlet Box, shown here as terminated

The MDVO Multimedia Outlet Box brings unique versatility for multimedia work area installations. The box design provides cable management and helps maintain cable bend radius. The outlet box's low profile design and side-entry offers better protection for patch cords. The outlet box can accept up to six EZ-MDVO, MDVO-Style Jacks or MDVO Multimedia Modules or three SC Duplex adapters. The MDVO Multimedia Outlet Box can be mounted directly on the wall or attached to standard electrical boxes. Included with the MDVO Multimedia box are three SC Duplex Mounting bezels and three MDVO Adapters.

MDVO Multimedia Modules address audio/video and fiber applications. Fiber modules are available for LC Duplex, SC Simplex, SC Duplex and ST Compatible for multi-mode and single-mode connections. The SC Duplex Adapter is a fiber adapter sleeve with flanges that mounts into the SC Duplex mounting bezel (included in the MDVO Multimedia Outlet box). Audio/video modules are available for SVHS, RCA, BNC and Video F connection.

Workstation Outlets (continued)

Multi-User Outlet Box, Adapter Strips and CAT5E BIX DVO Outlets

The Multi-User Outlet Box design allows for mixed media installations with a choice of connection strips. The box can accept either one or two 12-port MDVO Adapter Strips, CAT5E Connector Module Strips (BIX or 110), or a combination of both for a maximum of 24 connections.

The CAT5E BIX DVO Workstation Outlets are robust and installer-friendly products, combining punch-down connectors with standard modular

jacks. The outlet's unique, completely enclosed housing protects the connectors and allows the wires to be front-terminated on BIX Insulation Displacement Connectors (IDC). The snap-on cover plate allows easy access and eliminates visible mounting screws.

CAT5E BIX DVO Workstation Outlets offer headroom over the Category 5e cabling standard.

Accessories

A0405538, MDVO Blank

MDVO Blank Inserts can be used in any MediaFlex outlets, Interface plates, MDVO faceplates, adapters or boxes to fill in unused ports.

The Colored Bezels are plastic inserts that fit over the face of MDVO-Style Modules to modify their color. They are particularly useful in installations where the churn rate is high and color identification of outlets is critical (ex.: segmented network with security levels). They also contribute to simplifying the management of the cabling infrastructure by using only one color of module for Moves, Adds and Changes (MACs).

ID Tabs are color-coded identification caps that can be inserted over the MDVO-Style Modules. The ID tabs are available as blank, data or voice coded. They are available in eleven colors to facilitate identification and to match modern office decor. The flexible identification cap also acts as a protective cover eliminating exposure to dust and other contaminants when the module is not in use.

KeyConnect-Style Accessories include blank inserts available in almond, white and black as well as Dust Covers in clear plastic to protect unused ports.

Workstation Outlets (continued)
Rapid Termination Tool

Unique Features

Belden's new Rapid Termination Tool reduces termination time by up to 50%, including cable preparation. All conductors are terminated and cut at once; virtually eliminating the need for troubleshooting and re-work, saving hours of re-termination and re-testing. It provides a safer working method with no need for an impact tool with a sharp blade, or a Termination Station to hold jacks.

Key Specifications

- Terminates KeyConnect CAT6+ and CAT5E Jacks
- Diecast aluminium frame is lightweight and provides durability
- Patent Pending lever action reduces fatigue during termination process
- Polymer handle covers improve comfort
- Bottom cable entry allows ergonomic working position with minimum cable slack
- Handle Locking mechanism facilitates carrying and storage
- Easy to replace Headset (blade block and press head)
- Blade block uses stainless steel push blades and high grade tool steel knives for extra durability
- The Rapid Termination Tool is guaranteed for 5,000 terminations

Tools

AX100749, IBDN 110 Connecting Tool

The IBDN 110 Connecting Tool is a no-impact connecting tool used to terminate cables, pigtailed or cross-connect wires on any KeyConnect module or 110 product. The IBDN 110 Tool is a spring-activated hand tool. A single forward movement will seat the wire into the IDC clip and cut off the excess wire. The tool will terminate 22, 24 and 26-AWG plastic insulated solid copper conductors.

KeyConnect-Style Modules or MediaFlex Inserts during pair placement and wire termination. Cable retainers on each end of the station will secure and hold cables during the pair placements process. The flat bottom surface will provide the required stability to safely terminate the modules. The tool is made of very durable plastic and its low profile makes it an easy tool to use and carry.

1797B, Cable Preparation Tool

The Bonded-Pair Cable Preparation Tool makes it faster and easier to prepare cables for connector termination. This tool is ideal for use with Belden Bonded-Pair cables, providing special features that help separate twisted pairs. It can also be used to prepare any unbonded-pair cable for installation.

The Outlet Release Tool is a very convenient tool for servicing the MediaFlex and Interface outlets. Its bent tip allows for easy front removal of MediaFlex inserts, especially when used in Angled Entry plates. It is also very useful to extract KeyConnect Modules from miscellaneous mounting hardware.

The Termination Station is an ergonomically designed holder that provides stability to the KeyConnect Module during the termination process. The station has pockets with locking features that steadily holds either MDVO-style or

The Patch Cord Tool allows to connect and disconnect RJ45 patch cords installed in very high-density environments (48-port, 1U patch panels and high-density networking equipment).

Labels

LabelFlex

The LabelFlex solution is aimed at simplifying network management. Using the labeling system (software and label types), the installer can rapidly produce quality, application specific labels for most Belden IBDN products in a fraction of the time taken by traditional methods.

The range of Belden IBDN products covered by the labeling system is:

- GigaBIX and BIX Cross-Connect Systems
- BIX Modular Jack Connectors
- 110 Cross-Connect System
- KeyConnect Patch Panels
- Flex Patch Panels
- Workstation Outlets
- MediaFlex Faceplates series
- Cable Applications, 4-pair and 25-pair

Patch Cable	70-71

Belden understands that not every application is the same and unique situations and environments may call for a different cable solution. That's why our Copper Solutions Catalog also includes a variety of additional Belden quality cables to meet specific customer needs. From shielded, and limited combustible cables, to outside plant, multi-pair and patch cables, Belden has the copper cable you need for a variety of voice, data and control applications.

Category 6, 5E and 5 Pair Cables are available in shielded (F/UTP) plenum and non-plenum varieties with several color and packaging options to ease installation, handling and identification.

Limited Combustible Cable is a plenum cable that provides the ultimate in fire and smoke safety. These cables are specifically engineered to meet NFPA requirements for a Limited Combustible cable while offering beyond-standards performance for Category 6 and 5E.

Outside Plant (OSP) Cables are available in Category 6 and Category 5E cables and feature a thick polyethylene jacket for better moisture and cut-through resistance.

Backbone Indoor Cables are available in IBDN 25-pair Category 5E backbone cables for high-speed applications or in Category 3 UTP multi-pair cables, including up to 300-pair count cables for large voice communication systems.

Limited Combustible Cable, Category 6 and Category 5e

Nonbonded-Pair and Bonded-Pair

DataTwist® Limited Combustible Category 6 Cable is a revolutionary UTP cable engineered specifically to meet the NFPA requirements for a Limited Combustible cable and perform beyond requirements per ANSI/TIA/EIA-568-

C.2. Available only in a plenum version, the DataTwist Limited Combustible Cable is the next generation of cable technology - providing the ultimate in fire and smoke safety.

DataTwist 6 Limited Combustible Cable

DataTwist 6 Outside Plant Cable (OSP), Category 6 Nonbonded-Pair

DataTwist Outside Plant, Gel-filled

DataTwist Category 6 Outside Plant (OSP) cables are 4-pair products and are 100% gel-filled with a non-sticky PP compound that is easy to remove when terminating. Each product also has a thick polyethylene jacket for better moisture and cut

through resistance. DataTwist OSP products exceed Category 6 requirements as per ANSI/TIA/EIA-568-C.2.

Patch Cable, Category 6 and 5E

Nonbonded-Pair and Bonded-Pair

DataTwist Patch Cable

DataTwist Patch cables are flexible 4-pair products designed to be used in the work area, between patch panels, or as equipment cords. Whether Category 6 or 5E these products exceed Category 6 or Category 5E requirements as per ANSI/TIA/EIA-568-C.2.

Our high-end products, 1752A and 1875GB, are the premier patch cable products in the industry. Bonded-Pair technology is used to

give these flexible cables rock solid return loss performance when flexed or moved. Bonded-Pairs also improve the cable's balance which reduces the effects of noisy environments. These products also incorporate fused stranded conductors. Fusing the strands helps ensure that ambient moisture/humidity will not affect your system's insertion loss.

Patch Cable

Belden Part Number	Color	Length	Packaging	No. of Packages Per Pallet	Total Length Per Pallet
MediaTwist 6, Bonded-Pair, 4-pair Patch Cable, 24 AWG Stranded, CMR, Category 6

UltraFlex Series Enclosure 600/800

Features:

- Totally knock down design—reduces transportation cost significantly. Packed and shipped in a unique four pieces packing makes shipment within city limits painless and movement within floors a breeze
- Maximum 1200kg static load rated for basic rack
- Contoured front door, with high perforation density. The open area of the doors exceed 1000 Sq. Inch in both the front and back, allowing efficient breathability for the equipment mounted inside
- Light weight and strong
- Split level side panels provide convenient access to installed equipment
- Depth adjustable 19" vertical mounting rails in 6.35 mm increments
- "U" numbers marked on 19" rails
- Quick release, field reversible doors. Optional handles with number locks available for added security
- Multiple sizes available

Standard Configurations: 19" Wide

- Perforated Front Door
- Split Perforated Rear Door
- 4 EIA mounting rails with 9.5mm square holes use standard caged nuts
- 2 Solid Side Panels
- Top Panel with Openings
- Part # and Dimensions see below table
- Complete line of accessories (shelves, managers) show on page 2

Enclosure Specifications:

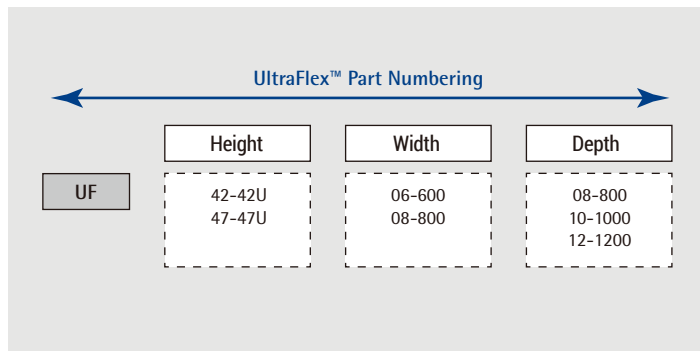

- Dimensions conform to EIA-310E, IEC-60297-2
- Five stage iron-phosphate pretreatment with textured powder coat finish, tested to 500 hours salt spray confirms to ASTM-D610-01 and ASTM-B117
- Low gloss textured black finish
- Premium grade Hot and Cold rolled steel sheet
- All materials RoHS compliant
