

Blank Rigid Panels

- Create rigid labels and signs using adhesive output from your printer
- Ideal for labeling situations and surfaces where applying an adhesive label is difficult
- Panels are sized slightly larger than label output to facilitate centered and accurate placement of label on panel
- Labels can be hand-applied to panel or applied using a BLS1255 cold press laminator
- Panels are pre-drilled with holes in corners for mounting with screws or cable-ties
- Panels can also be mounted using foam tape or magnetic strips (available below)

Creating a Rigid Sign or Label

1. Choose your rigid panel, select the needed material size and print your adhesive label

2. Peel away the first 1/2" of liner from the label. Apply to rigid panel, aligning edge of label with edge of panel

3. Insert panel and rotate handle until first 1" of panel is "pinched." Then grasp liner and pull it away as you rotate the handle to move the panel through laminator

4. In less than 30 seconds you have a rigid sign ready to hang
