

Side Bay Racks

Side bay racks are available in either a single or dual bay configuration and come complete with casters. The reversible top on some models is contoured to match the desktop, allowing the racks to be positioned at a comfortable angle to the user on the left or right side. Additionally, these racks feature a unique two position top height, allowing the user to determine whether the racks join the desk flush or slide under the desktop. 11-gauge, 10-32 threaded front and rear rackrail are set back 2" for equipment clearance. Single bay racks come standard with front and rear doors, while dual bay racks include doors on one bay only. Racks may also be ordered less doors. Side bay racks ship fully assembled.

Cooling

Gasketed plexiglass front doors and gasketed laminated rear doors on selected racks control noise and open 95° on concealed hinges. The rear door features a built-in quiet fan for cooling plus removable filter kit, and a brush grommet at the door bottom allows cable exit while maintaining a seal for air flow.
