

RJ45 Dust Cap

The RJ45 Dust Cap has been designed and manufactured by HellermannTyton to prevent foreign bodies such as dust, copper cable strands and cable insulation entering standard RJ45 jacks. Made from durable Elastomer material giving a reliable, secure grip of the socket.

Block, reduce or restrict airflow in communications rooms cabins to better control temperature and operational conditions of IT equipment

The swing tab allows for operation in tight/compact spaces and assists with grip. Easy to plug; simply push the Dust Cap into an empty un-shuttered RJ45 socket. To unplug, push down the swing tab then pull on tab to remove.

Features:

- RJ45 Modular jack fitting
- Swing tab for ease of use in compact locations
- Manufactured with durable Elastomer material
- 94HB UL flammability rating
- Operational temperature of -10Deg C to $+60\text{Deg C}$
- Shutter to ensure dust free operation
- RoHS Compliant
