

UCP Series Modular Custom Panel System

Build Your Own Custom Connector Panel Using Off-The-Shelf Components!

UCP System

Design and build your own custom connector panels using off-the-shelf materials! Our UCP Series modular custom panel system assembles quickly and easily using either a 2 or 4 space frame kit and your selections from an extensive collection of prepunched modules. UCP modular assemblies simply bolt together using supplied hardware. A single tier of five modules bolts across a 2 space frame kit, two tiers of five modules bolt across a 4 space frame kit.

Modules are prepunched to accept XLR, Neutrik, Elco, Canare and a host of other connector configurations (see accompanying diagrams). The inherent strength of the interlocking system eliminates panel deflection while inserting or removing connectors. When completed, all hardware is flush to create a professional appearance with no unsightly gaps. Visible parts have a black brushed and anodized finish. All modules are constructed of aluminum. Blank and vented panels are also available to fill unused spots.

Frame Kits

Bolt modules to them in any combination.

Part #	Racking Height
FK2	3-1/2" (2 rackspace)
FK4	7" (4 rackspace)

Blank Module

Available for filling unused spots or drill your own connector mounting pattern.

Part #	Width	Part #	Width	Part #	Width
UCPB1	single	UCPB2	double	UCPB3	triple

UCP Vent

Fills unused spaces while providing ventilation.
