

SignalSafe™ IEC Power Cords

Maintain Signal Integrity - Insist on SignalSafe™ Technology

SignalSafe™ Design

incorporates tightly twisted conductors to virtually eliminate AC magnetic fields

RoHS C US LISTED

Spec. # **96-01081**
for full product info.

Unwanted AC magnetic fields can infiltrate the signal path & cause problems in your installed systems. Power cords under load, especially long ones, are sources of AC magnetic fields. To minimize these effects in your systems, look for the stripe that identifies the SignalSafe technology. SignalSafe power cords feature tightly twisted conductors to reduce the effects of AC magnetic fields.

4 key benefits:

1. Minimize AC magnetic interference: SignalSafe wiring cuts magnetic field strength by more than 80% over standard rubber power cords – now power and signal wiring paths can be closer than ever without interference
2. Neater installations: SignalSafe cords come in 6 lengths from 6" to 48". Eliminating excess cable length improves cable management, appearance, and assists cooling airflow
3. More plug style options: Choose from straight plugs, or right or left angled, whatever meets your needs best.
4. Color coded: Standard SignalSafe cords are identified with a bold blue stripe. New contrasting red stripe option can help you identify separate circuits.

Insist on the stripe for signal Integrity!

Angled plugs available

left right also available in red stripe for circuit separation
