

Expandable Sleeve

LANGOFLEX PPS

LANGOFLEX PPS is a high temperature, non-flammable and lightweight expandable sleeving made from 0.25mm diameter of polyphenylene sulfide (PPS) monofilament.

The open braid construction of the sleeving allows each size to expand and contract to slide easily over irregular shapes for a snug fit.

Also allowing a dissipation of heat and moisture, the open weave prevents condensation and provides complete drainage.

Application:

LANGOFLEX PPS provides durable protection

over tubing, hoses, wires, wire bundles, wire harnesses, cable assemblies and flat ribbon cable.

LANGOFLEX PPS is extremely resistant to chemical attack and exhibits good resistance to cut-through, abrasion, chafing and fungus.

With low levels of toxicity, smoke generation and out-gassing, LANGOFLEX PPS is the ideal high temperature, flame resistant protective sleeve in aerospace, military, marine, electronic, fiber optic and telecommunication applications.
