Servo Cable Assemblies for static and continuous flexing applications

LUTZE Silfex® static cable features:

- semi-conductive layer for high voltage spikes, reducing likelihood of corona-effect
- increased reliability and lifetime
- superior EMC compliance with 85% optical coverage of flexible braid shield

LUTZE Superflex® Plus continuous flexing cable features:

- PP insulation with better electrical values and lower capacitance than PVC/Nylon
- rugged PUR jacket delivers improved mechanical performance and long flex life
- for the most demanding continuous flexing applications
