

Firewall * III Instrumentation Cable Multi-Conductor Shielded (XLPE/CSPE)

Features

- Thermosetinsulation and jacket for enhanced thermal stability
- Specially formulated insulation for superior long term water resistance
- Extremely flame retardant
- Nuclear qualified with a minimum40-year thermallife expectancyat 90°C
- Radiation resistant (up to 200 megarads)
- Full traceability
- Excellent mechanical properties
- Tin-coated copperconductors for improved terminations and corrosion resistance
- · All singles pass a wet dielectric (tank) test prior to cabling to verify electrical integrity
- All jackets have printed sequential footage markers for improved inventory control
- Easy strippability for installation ease

Performance Standards

- Insulation in accordancewith ICEA StandardS-66-524 and UL approved for 90°C applications in bothwet & dry locations
- Jackets in accordancewith ICEA StandardS-19-81 for heavy-dutychlorosulfonatedpolyethylene(CSPE)
- Class 1E qualified in accordancewith IEEE-383 1974 and IEEE-323 (Rockbestos Reports QR-5804 or QR-5805)
- Cable passes IEEE-383 1974 70,000 BTU/hr vertical tray flame test as modified by NRC Reg. Guide 1.131
- Cable passesICEA 210,000 BTU/hr vertical tray flame test(StandardT-29-520)
- Single conductorspass the vertical flame tests specified in IEEE-383 1974 para. 2.5.6 (ICEA S-19-81 Section 6.19.6) and UL VW -1
- Quality Assurance programin accordancewith 10 CFR 50 Appendix B
- UL Listed Type TC for cable tray installations (UL 1277)
- In accordancewith the National Electrical Code (approved for Class 1, Division 2 hazardouslocations)

Construction

Conductor: Annealed, tin-coatedcopper, Class "B" strand (ASTM B-8 & B-33)

 $Insulation: \ Proprietary heat, moisture and radiation resistant flame\ retardant cross linked polyethylene$

Circuit Identification: Colored insulation per ICEA Method 1, Table K-1

Fillers: (When required)

Shield System: Helically applied a luminum/polyestel aminated tapes hield in continuous contact with a flexible strand, tin-coated copperdrain wire

Binder Tape: ** Helically applied

Jacket: Black, heavy-dutychlorosulfonatedpolyethylene(also available in neopreneand FR-XLPE)

* Rated 90°C for normal operationin wet and dry locations, 130°C for emergencyoverload conditions, and 250°C for short circuit conditions.

** Not requiredon 2, 3 and 4 conductor configurations

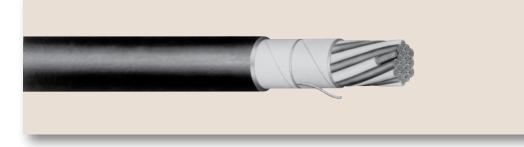

A Marmon Wire & Cable / Berkshire Hathaway Company

Scope

Firewall * III Instrumentation Cable is a totally thermoset construction specifically designed for applications in power generation plants, substations and other similar locations. It is intended for use in harsh and demanding environments, including Class 1E Nuclear applications. It may be installed in trays, ducts, conduits or in direct burial applications to perform a variety of signaling and related functions. Designed for use on circuits where shielding from external electrostatic interference is required.

Firewall [®] III Instrumentation Cable

90°C*, 600 Volt Class 1E Nuclear NEC Type TC UL Listed Spec. RSS-3-021

16 AWG, 7 Strand

Product Code	Number of Conductors	Insulation (inch)	Thickness (mm)	Insulated Conductor Diameter (inch)	Drain Wire Size/Stranding	Jacket Thickness (Mils)	Nominal Ove (inch)	erall Diameter (mm)	Approximate Net Weight (Lbs/M')
