

# 3M™ Heat Shrink Tubing EPS-200

## Adhesive-Lined, 2:1, Flexible, Polyolefin

Data Sheet

July 2010

### Description

3M™ Heat Shrink Tubing EPS-200 is a 2:1 thin-wall, flexible tubing offering the advantages of integral, adhesive-lined construction. The tubing is made from flame-retardant, flexible polyolefin with a thin layer of special thermoplastic adhesive. The heat-shrinkable outer wall is selectively cross-linked, while maintaining the high flow and excellent adhesion of the inner sealant liner.

When heated in excess of 121°C (250°F), EPS-200 tubing rapidly shrinks to a skintight fit, forcing the melted adhesive lining to flow and cover the substrate. The adhesive forms a flexible bond with a wide variety of rubbers, plastics and metals. Upon cooling, the adhesive solidifies, forming a permanent, non-drying, flexible and water resistant barrier. Adhesive reflow will occur at temperatures above 80°C (176°F).

### Agency Approvals & Self Certifications

Meets the requirements of:

UL Listed, UL File E-39100  
MIL-DTL-23053/4, Class 2

### Applications

EPS-200 tubing offers convenient protection of electronic components, wire splices, or bundling of wires. Automotive, truck and marine wiring splices and connections are quickly and easily protected from harsh environments.

### Shrink Ratio

EPS-200 tubing has a 2:1 shrink ratio. When freely recovered, the tubing will shrink 50% of its as-supplied diameter. The recovered wall thickness of the tubing is proportional to the degree of recovery.

The operating temperature range is from -55°C (-67°F) to 110°C (230°F), with a shrinking temperature minimum of 121°C (250°F).
